

**FORM FINISHER**

## Short introduction:

- Controlled by imported PLC computer, and made convenient for operation. Particular computer control program design. Whether thick or thin cloth, you can get good effect.
- Have components that are used to adjust wind pressure, shoulder width, waistline, hipline, lap and front garment. Small garments like women wear can be pressed by this finisher.
- This finisher adopts aluminum air bar. The quality of pressing is professional. No mark is observed on cloth.
- Pneumatic design, guaranteed spray steam quality.

## Main Parameters

Model / Specification	Unit	SFF
Part for pressing		Upper Garment
Steam Pressure	MPa	0.4-0.5
Steam Consumption Quantity	Kg/h	25
Size	Mm	1300x500x1700
Weight	Kg	70
Equipment Matched by Outside		Steam Boiler
Voltage	V-Hz	220/50
Power	Kw	0.55
