

AUTOMATIC FEEDER

MODELS AVAILABLE

S-FEED

💧 OPERATION COMFORT

Front tipping feeding board with height of 1020mm makes our feeder easy to operate. And it takes small space cause its compact structure. The high speed feeding roll send the linen in the suction slot quickly and spread the linen flatly, so operators can deal with the next sheet without delay. Four pushing –pull windows under make it easy to clean the wastes inside.

💧 HIGH EFFICIENCY

High function suction motor gives the suction slot a strong power which makes the feeding board has high absorption force, which means linen can be easily send into the feeder.

💧 ADAPTABILITY

The suction fan is frequency converting controlled, so operators can choose different strength to deal with different type of linen, for example, pillow cover, table cloth and so on. The pressing roller can also make it easy to smooth the small linen.

💧 INTELLIGENCE

Feeding brushed inside smooth the linen flatly when the linen passing by. Holes in the conveying belts raise the efficiency of suction effect, which makes the linen spread smoothly and flatly on the belts. And feeder speed is adjustable to match the ironer.
